

ABSTRACT OF THE DISCLOSURE

A truck-bed extension adapted to attach to a truck with a truck gate and a hitch receiver. The truck-bed extension is formed primarily of removably connected sections of crafted tubing that can be assembled and disassembled by a single person. The truck-bed extension attaches to the truck hitch receiver without obstructing the gate regardless of the open or closed position of the gate. The truck-bed extension may also serve as a mobile work surface, such as a craftwork surface.
